- **DataBase:** My SQL, Oracle, MongoDB
- **Tools:** Git, VS code

EXPERIENCE

Full Stack Developer Intern (KarvaTech Solutions, Lucknow)

Ongoing (Paid Internship)

- Successfully completed 4 months of hands-on experience, contributing to automation and design-focused projects.
- Designed and built a product catalog page and a responsive website for Coromass Crop Care Industries.
- Created a CRM system for LBSIMDS, streamlining operations and improving data management efficiency.

Web Developer Intern (SoftPro India Computer Technology, Lucknow)

- Learned and implemented new technologies to develop responsive and mobile-friendly web applications.
- Worked on small-scale projects, gaining practical experience in web development and enhancing problem-solving skills.
- Built a strong foundation in full-stack development by applying modern tools and frameworks.

PROJECTS

Weather App

- Developed a weather forecast web application using HTML, CSS, and JavaScript.
- Implemented a responsive design.
- Utilized the OpenWeatherMap API to fetch real-time weather data based on user input (city name).
- Handled errors and provided feedback to the user in case of invalid city names or API request failures.

MyContacts

- Backend Application using Node.js and Express.js
- RESTful APIs, middleware integration for authentication, validation, and error handling were implemented.
- CURD operation is used on MongoDB database, Bcrypt used for password storing.
- Secure user authentication and data manipulation using JsonWebToken.
- Express-async-handler used for error handling through middleware.
